Dear Dr. Henney, ^{630 '99}

It concerns me when I read that we might be exposed to eating genetically altered food without our knowledge. We need to be informed when a food has been altered - an individual should have the choice of ingesting something that is no longer from its original base. The magazine I read this in referred to it as G.M.O's. Please add my name to the list of consumers who would like all G.M.O's to be labeled.

I need to know.

I need to be allowed to make the choice.

Thank you,
Diana R. Gore
